

EMODnet – Serving the EU Member States

Webinar - EMODnet
A decade of achievements
connecting marine data to knowledge
22nd September 2020

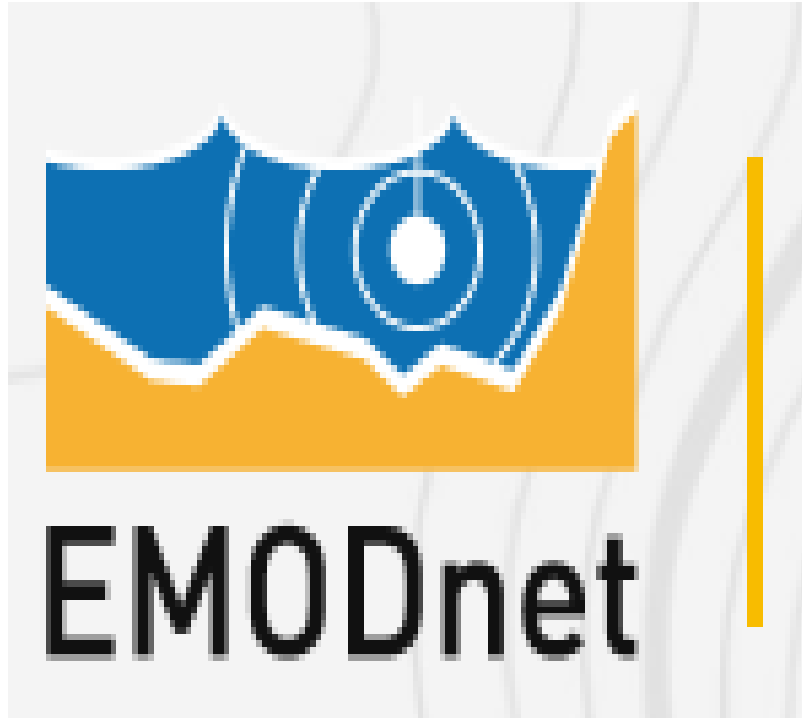

Aldo Drago
Head, Physical Oceanography Research Group
University of Malta

aldo.drago@um.edu.mt

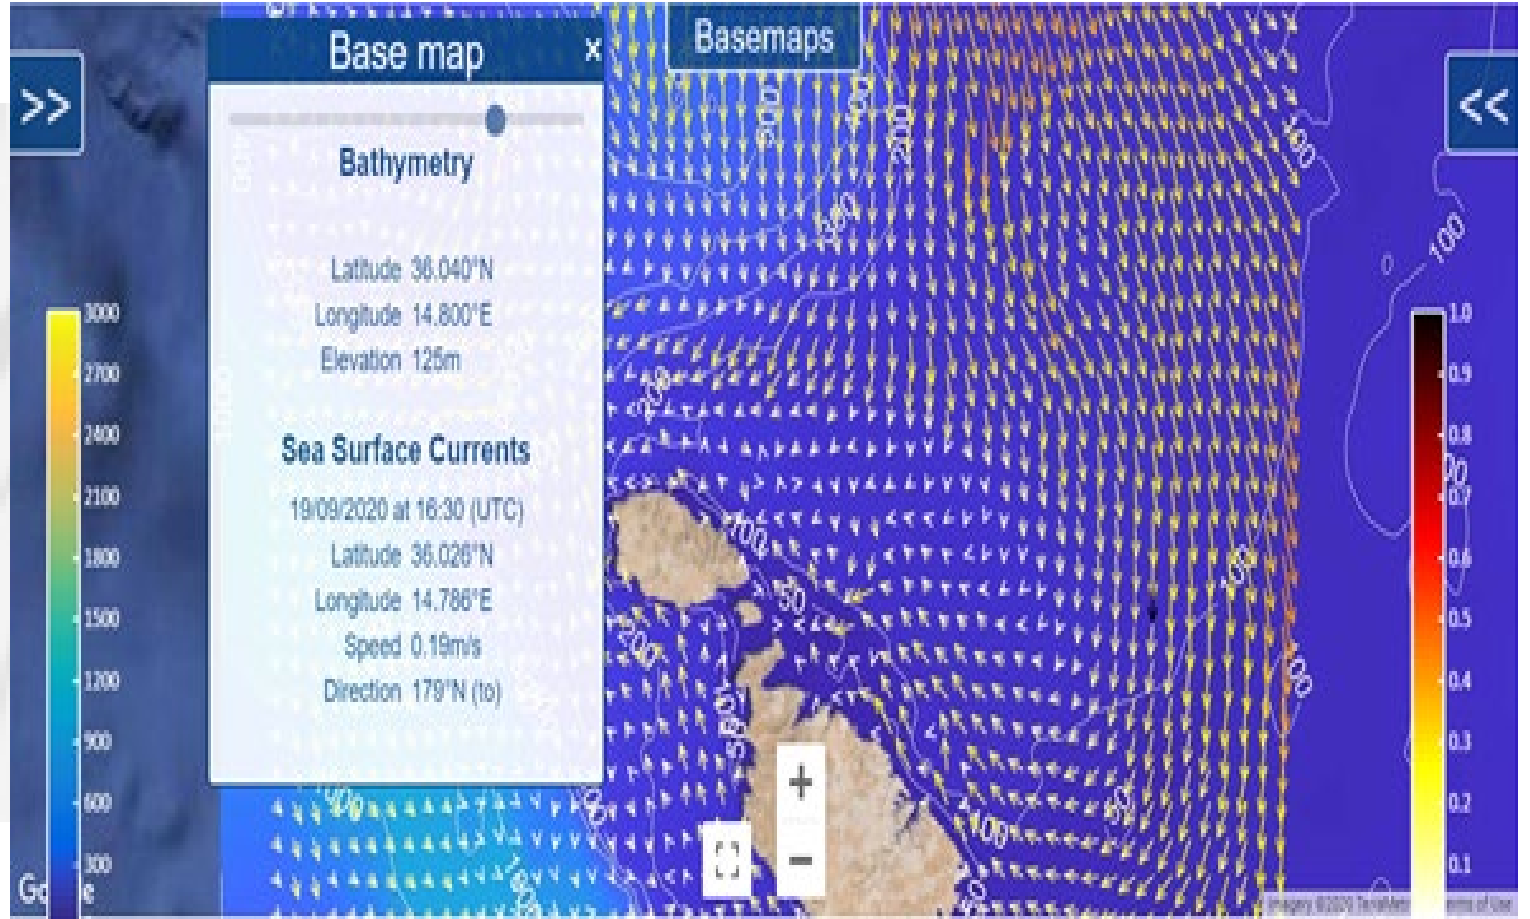

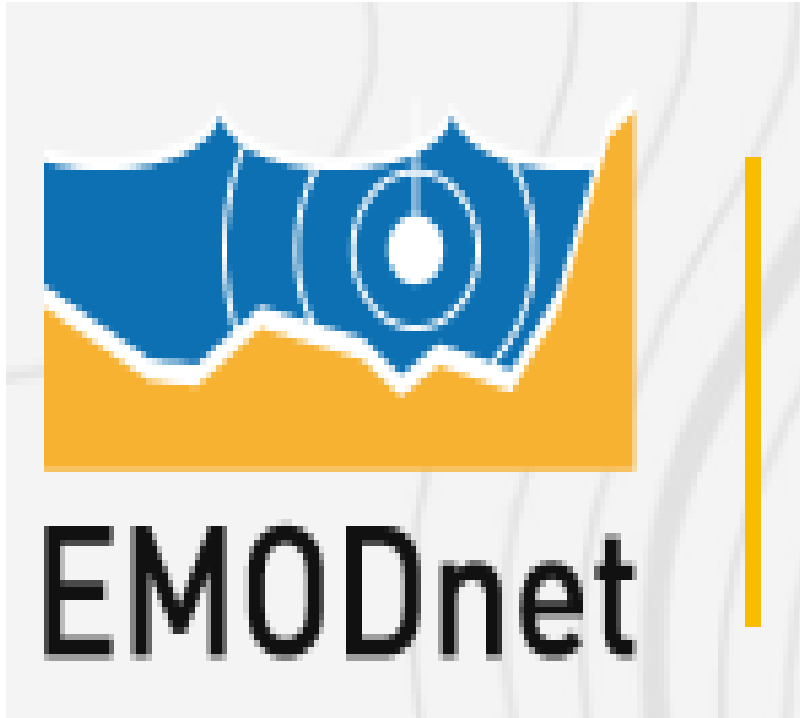

Serving Academia

Training the marine professionals of tomorrow

Providing reference baseline data

EMODnet

EMODnet Data Ingestion

WAKE UP YOUR DATA

Set them free for Blue Society

The **Data Ingestion Portal** facilitates submitting marine datasets for further processing, Open Data publishing and contributing to applications for society.

emodnet-ingestion.eu

Enabling marine intelligence

Some basic concepts about data

Data is an asset for Blue Growth and Green Deal strategies

Integrating data across scales, types, geographical domains and nature

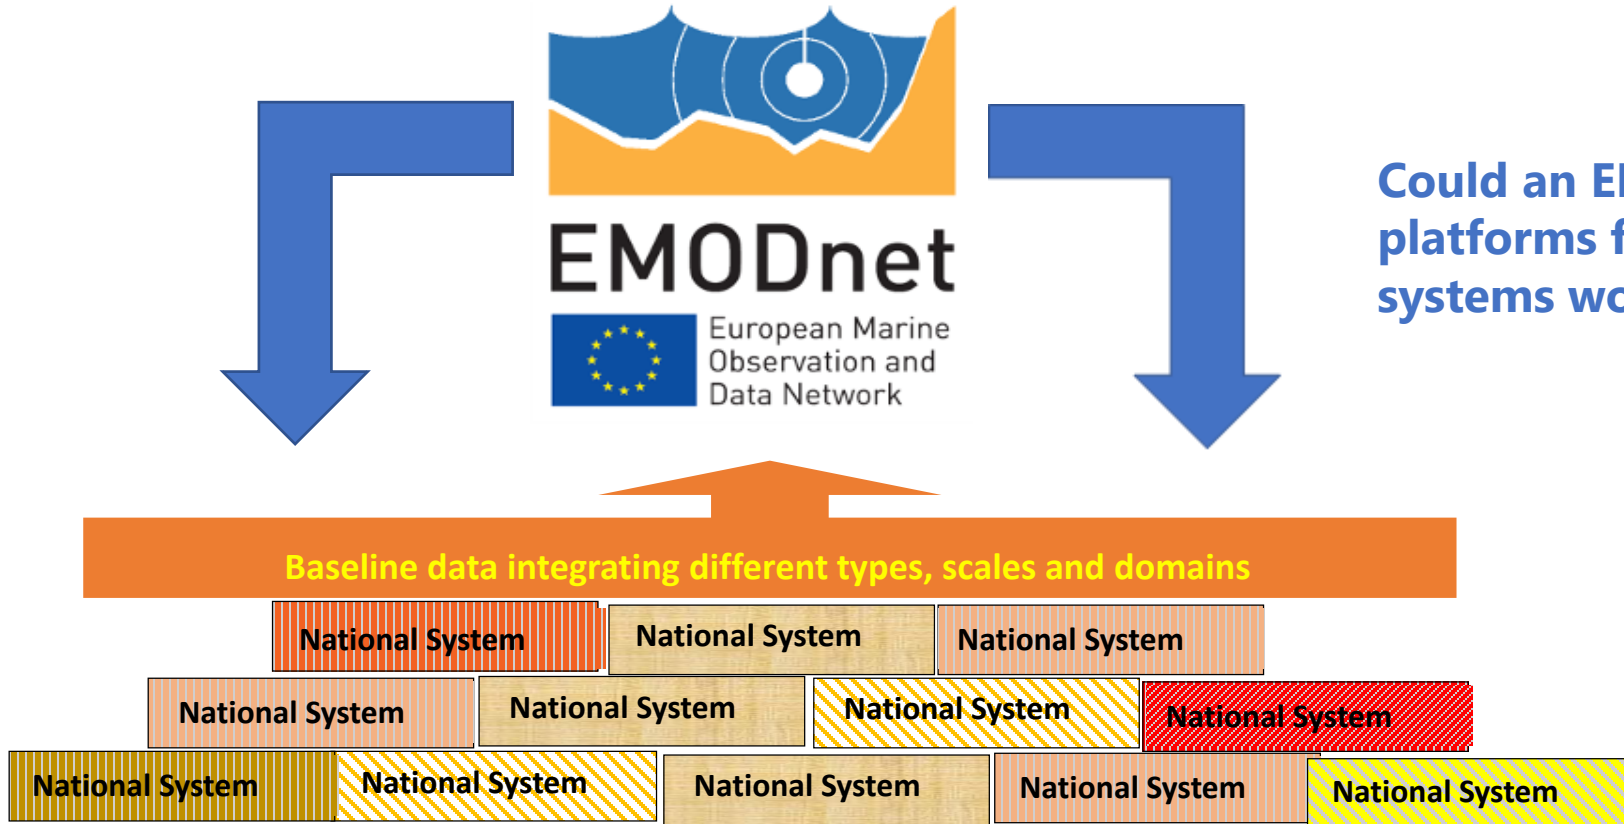

Win-win approach and the concept of circular data systems

How can EMODnet evolve to serve Member States?

Challenge of MS to coordinate large datasets, needing to adopt a harmonised approach to data management (commons standards) to enable an efficient subsequent integration of data that reaps the full benefits to users

MS need to build, organize and maintain their baseline data in a seamless, interoperable and synergistic system?.....such systems need to be similar and not just compatible?linked by machine-to-machine communication

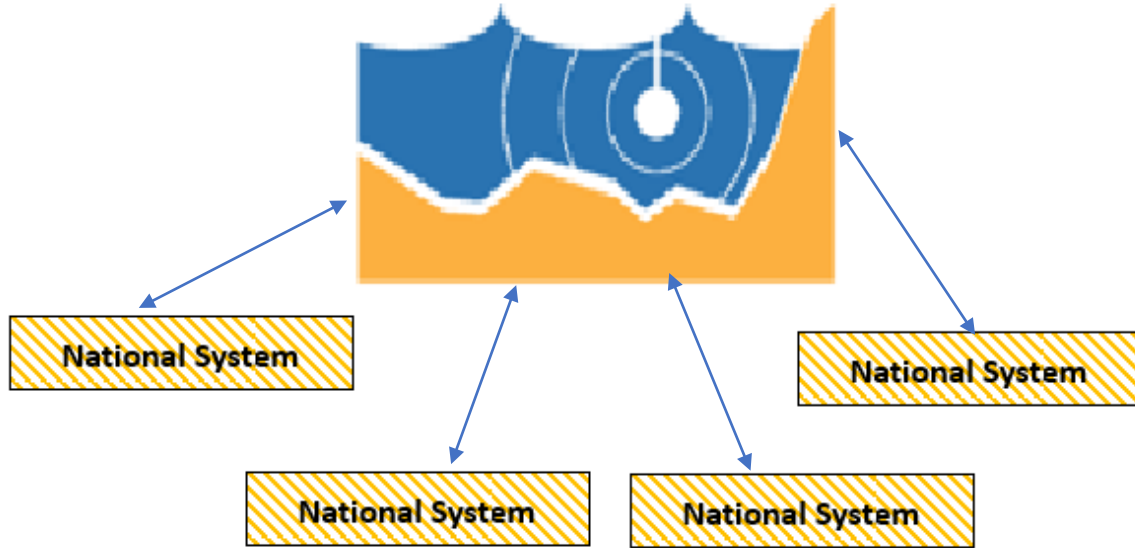

Could an EMODnet platform of platforms federating national systems work?

Could an EMODnet platform of platforms, federating national systems work?
